

## The Nord Security family of business products

NordLocker was developed by Nord Security, a global leader in all things cybersecurity.

A future-forward, adaptive network access security solution for modern businesses.

Encrypted cloud to sync, back up, share, and work securely.

An intuitive and easy-to-use password manager, built with Zero-knowledge encryption.

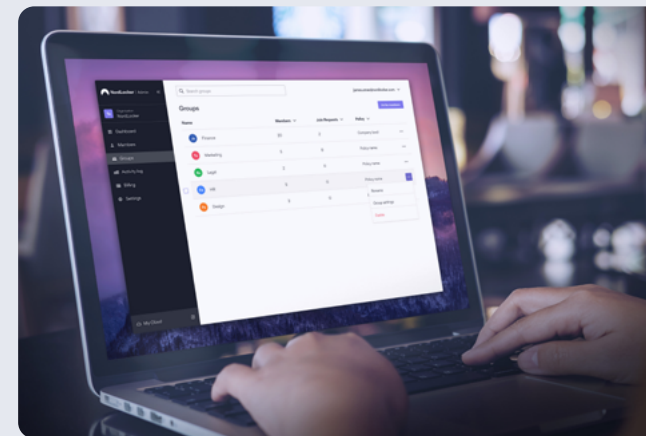

### Protect your data with NordLocker for Business

NordLocker protects files in an end-to-end encrypted cloud. For a business, that means the ability to work in a private and secure environment with confidence. The Admin Panel enables you to control all your user accounts and company data from a single app. At the same time, no one can access the files they don't have permission to, even us.

## Why use NordLocker for business?

Create a secure work environment for your company data. Store, sync, back up and share your files with ease and confidence. NordLocker was built by cybersecurity experts to meet all data security needs. It's data ownership that stays with you.

## Next-generation security for your business data

### Client-side encryption

The world's best cryptography algorithms (AES-256, ECC) and next-generation ciphers (xChaCha20-Poly1305, Ed25519) protect your data across your devices and the cloud.

### Multiple security layers

Enable multi-factor authentication for additional security with the use of physical security keys, authentication apps, or single-use backup codes.

### Protection from ransomware

Ransomware is a virus that infiltrates devices and blocks the owner's access until a ransom is paid. NordLocker protects your data by encrypting it and backing it up via a cloud.

### Zero-knowledge security

NordLocker is built with zero-knowledge architecture, protecting your data while in transit and at rest. End-to-end encryption prevents anyone from snooping on your data or accessing it without your knowledge and permission.

## Stay in control

The business Admin Panel is an easy way to manage all of the company's accounts.

Revoke, suspend, and transfer user licenses as your team changes.

Automatic backup protects you from unexpected data loss, ransomware, and other types of malware.

Scalable private cloud storage will always fit the needs of your growing business.

Complete privacy and security – you always have full control over your data.

## A solution for individuals, teams, and organizations

- **Drag-and-drop interface**  
Your team members already have the necessary skills to use our software.
- **Share files securely**  
Never leave your files exposed. Share any file securely and always stay in control of who can access it.
- **Store files on your device**  
Our cloud is designed to keep your data backed up and synced, but you can also encrypt any file and store it on your device.
- **Save space on your device**  
Space Saver is a feature that allows you to offload your files to the cloud and save precious device space.
- **Cross-platform access**  
Get NordLocker on Windows, macOS, Android, or iOS devices. Other OS? Use any web browser to get access to your private cloud.

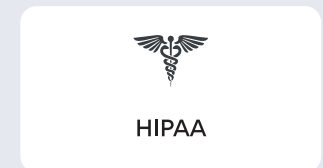

## Is NordLocker right for you?

Increasing cyber threats and privacy laws force companies to put extra protections on their data. Do you work with confidential information, or would you like to protect your company from falling victim to ransomware? NordLocker provides a centralized hub where you can access all your company data without exposing it. It automatically backs up your files and gives you a secure channel to share them.

## Improve your compliance standards

As many new and existing privacy laws focus on data security, using NordLocker is one of the easiest ways to boost your compliance.
